

250 Watt Stereo FM Transmitter with RDS

FMTX250v3

- ### Features
- Adjustable RF output power up to 250 Watts
 - Integrated audio processor
 - MPX stereo subcarrier generator
 - RDS Encoder
 - Latest enhancement mode FET RF amplifier

- ### Applications
- Complete FM stereo service with RDS
 - Full chain reserve back-up
 - Independent radio service
 - Community radio service
 - Special event and emergency stations

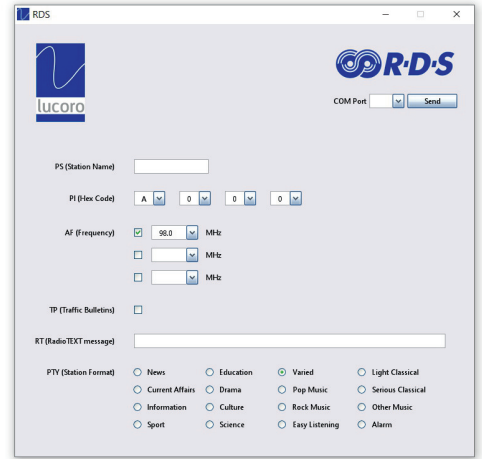

The FMTX250 is a fully integrated 250W Stereo FM broadcast system with DSP audio processing, stereo encoder and RDS generator in a single, highly compact product. The result is a truly first class transmission system for cost conscious radio stations who demand uncompromising performance.

The audio processor provides slow gain control, split-band compression, plus composite clipping and digital FIR 15kHz filtering. Three presets are available to suit a range of programme formats.

The internal RDS encoder can operate without the need for a data feed to the transmission site. The content can be updated by the user at any time, via the FMTX100's USB port from a Windows™ PC or Laptop. Dynamic RadioTEXT updates, if desired, can also be implemented via RS-232.

A network (TCP/IP Ethernet) connection is also provided, to enable remote web page monitoring and control. An AES/EBU input option is also available.

The ceramic bearing fans used give an eight year fan life (in ideal environmental conditions) and components are carefully specified to give a long service life.

Specifications

Dimensions:	2U 88 H x 482 W x 350 D (mm)	Output Power:	30 - 250W
Weight:	5.0kg	Harmonics & spurious:	-75dBc typical
Audio input:	XLR 600ohm +8dBu	RDS Groups:	PS, PTY, TP, TA, PI, RT, AF
RF output:	N female 50ohm	Voltage:	100 - 250Vac 50-60Hz
I/O Control:	9-way D-sub female	Compliance:	EN302018, EN301489
Frequency:	87.5 - 108MHz
